

15 minutes from Old Riga, French project.

Lubānas 123, Rīga

Deal: BUY

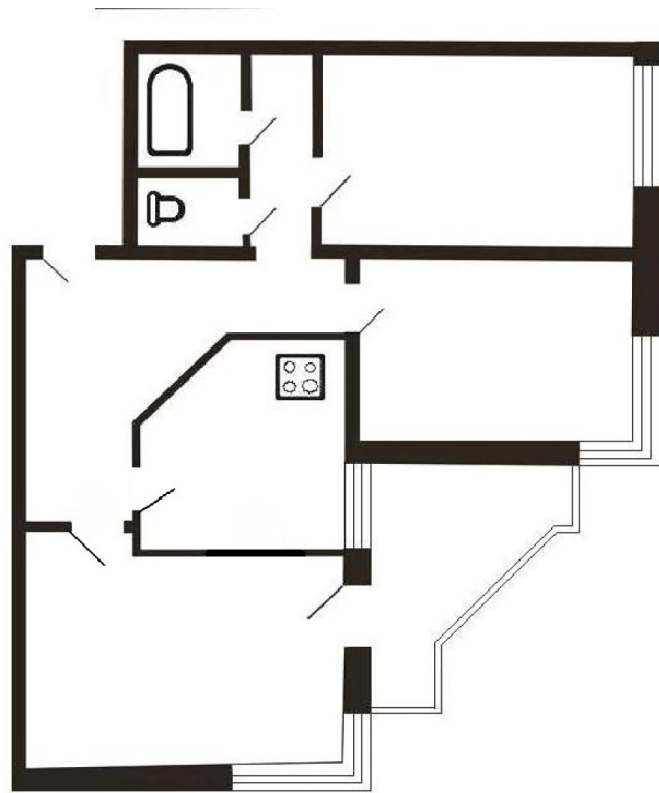

Type: Apartment

Total Area: 68 m²

Sale Price: 68000 €

One of the best and rare serial projects. This building was built using a special monolithic concreting technology. Consequently, the entire building – both the frame and the walls – is a single monolithic reinforced concrete structure. French project monolithic reinforced concrete structure buildings are therefore not characterized by a number of problems that are inherent in large-panel buildings, for example, the walls are smoother and more uniform, there are no unnecessary troubles with filling joints, etc. The living room is very spacious...
